

We buy flour,
water and yeast

Every ingredient
is weighed to
make our recipe

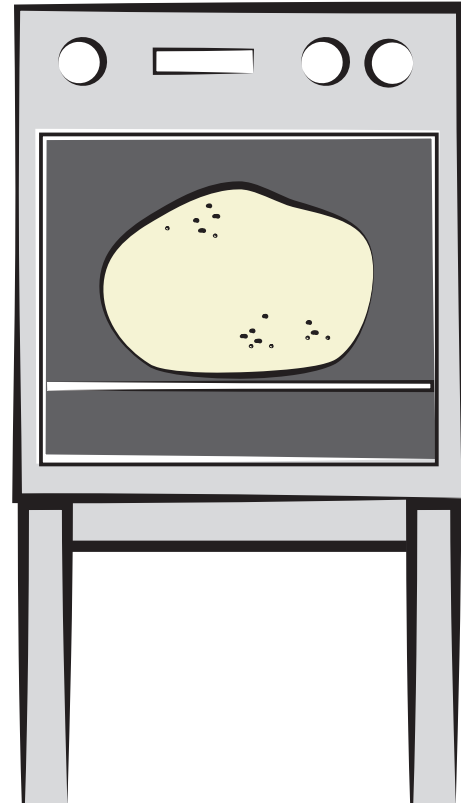

Everything is
mixed together
to make dough

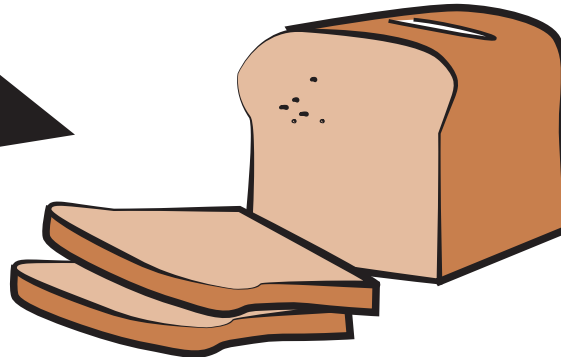

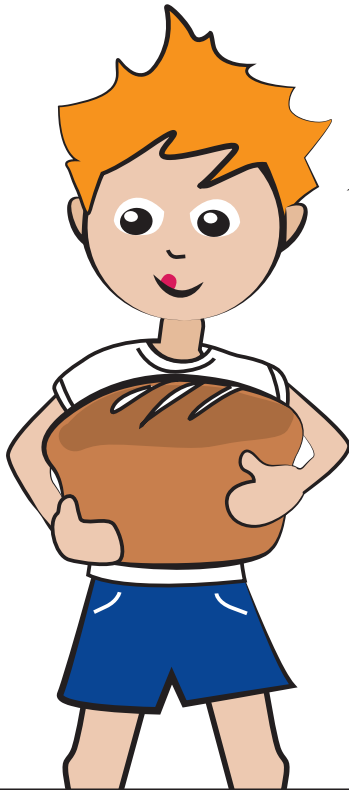

The yeast begins
to grow and the
dough rises

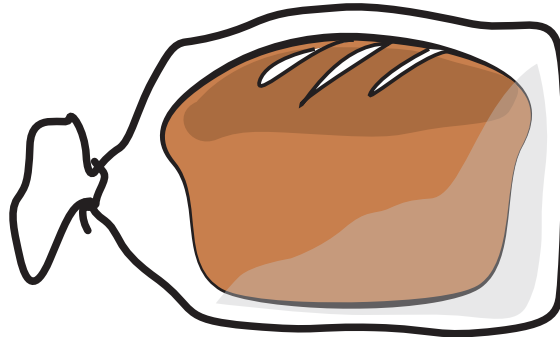

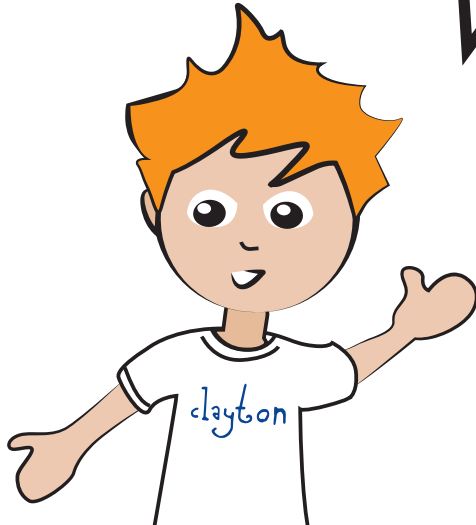

The dough is put
into the hot oven
and is baked

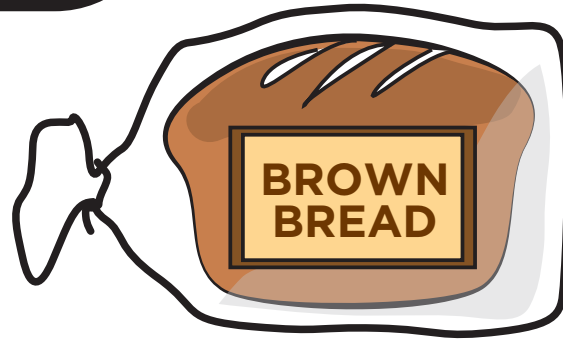

When the dough
is baked it is
called bread

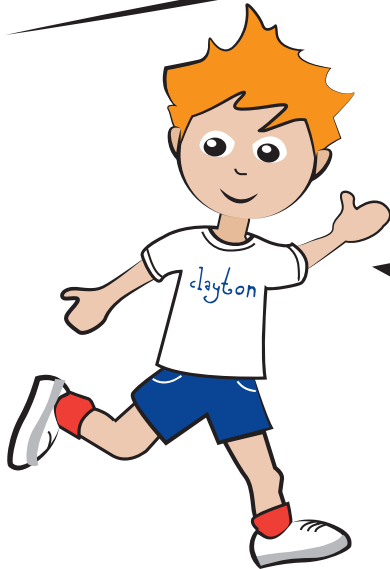

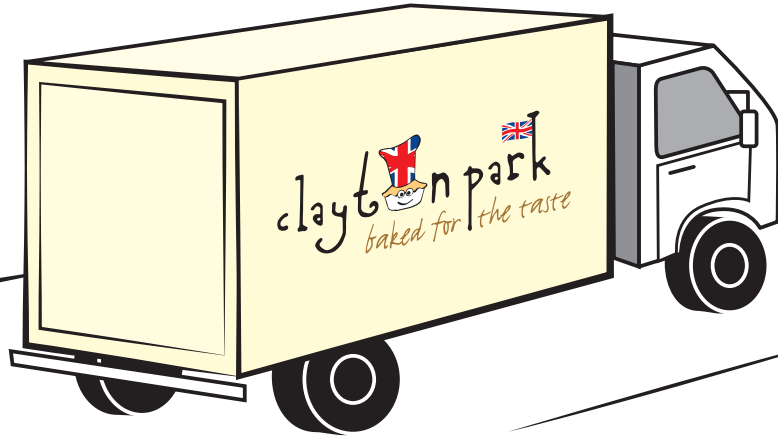

The bread is
then packaged
to keep it fresh

A label is put on the
package to tell us
about the bread

The bread is then
delivered to the shops
so we can buy it
